

Josera

Léger

Your lazy cat prefers lolling on the couch instead of hunting mice?

JOSERA Léger with its reduced calories and increased fibre level is the right nutrition for less active cats or cats who are prone to being overweight, e. g. after castration.

- Ideal for less active cats, cats prone to being overweight and cats on a reduced diet for gentle weight loss
- Special dietary fibre gives your cat a full feeling
- A high protein content stimulates the metabolism
- L-Carnitine supports fat metabolism

Complete feed for adult cats with lower calorie requirements

Composition: poultry meat meal; maize; greaves; rice; cellulose; sugar beet pulp; poultry protein, hydrolysed; maize gluten; poultry fat; poultry liver, dried; potassium chloride; mono-sodium phosphate.

Weight Control

Special dietary fibres give your cat a full feeling. An increased protein level activates the metabolism. L-carnitine supports fat metabolism.

Urinary-pH 6.0-6.5

The careful selection of ingredients and the special recipes ensure a perfect calcium-phosphorus ratio and a reduced magnesium level. A pH-value of 6.0-6.5 is being supported and can reduce the risk of urinary stone formation.

Anti-Hairball

Dietary fibres support the transport of swallowed hairs through the digestive track. This way they can prevent the development of hair balls.
