### Grainfree

This recipe does not contain any grain and is suitable as a daily grainfree diet for healthy and sensitive cats.

### Urinary-pH 6.0-6.5

The careful selection of ingredients and the special recipes ensure a perfect calcium-phosphorus ratio and a reduced magnesium level. A pH-value of 6.0-6.5 is being supported and can reduce the risk of urinary stone formation.

### Anti-Hairball

Dietary fibres support the transport of swallowed hairs through the digestive track. This way they can prevent the development of hair balls.
